Acknowledgments

Many persons participated in the diverse activities of the 1980 census. These acknowledgments generally reflect staff during the post-census data publication process. The Bureau was guided by then director, **Bruce Chapman**, and Deputy Director, **C. L. Kincannon**. Primary direction of the data publication program was performed by **William P. Butz**, Associate Director for Demographic Fields, assisted by **Peter A. Bounpane**, Assistant Director for Demographic Censuses, in conjunction with **Barbara A. Bailar**, Associate Director for Statistical Standards and Methodology, **Howard N. Hamilton**, Acting Associate Director for Information Technology, **James D. Lincoln**, then Associate Director for Administration, and **Stanley D. Moore**, Associate Director for Field Operations. The Director's staff was assisted by **Sherry L. Courtland**. Direction of the census enumeration and early processing activities was provided by **Vincent P. Barabba**, former Director; **Daniel B. Levine**, former Deputy Director; and **George E. Hall**, former Associate Director.

Responsibility for the overall planning, coordinating, processing, and publication of the 1980 census was in the Decennial Census Division under the direction of **Stanley D. Matchett**, Chief, assisted by **Rachel F. Brown** and **Roger O. Lepage**, Assistant Division Chiefs. The following Branch Chiefs were responsible for support services: **Donald R. Dalzell**, **Stephen E. Goldman**, **Judith A. McKay**, **Dennis W. Stoudt**, and **Richard R. Warren**. **Jonathan G. Ankers**, **Mary Carstensen**, **John Murphy**, and **Nancy Rogers** prepared the programs for this report.

Responsibility for developing the housing portion of the 1980 census questionnaire content, designing the tabulations, and preparing this report was in the Housing Division under the supervision of **Arthur F. Young**, Chief; **Leonard J. Norry**, Assistant Chief; and **William A. Downs**, Chief, Decennial Planning and Data Services Branch. This report was prepared by **Robert W. Bonnette**, **Imelda J. Hall**, **Bernadette V. Nyers**, **Sherry B. Pollock**, **Helen Ryan**, and **Elizabeth P. Williams**. Important contributions were made by **Carmina F. Young**, Special Assistant.

Administration support was provided by the Administrative Services Division, **Robert L. Kirkland**, Chief, and **William C. Fanning**, Assistant Chief.

Computer processing was performed in the Computer Services Division, **C. Thomas DiNenna**, Chief, **James E. Steed**, **George M. Bowden**, and **Joseph J. Sferrella**, Assistant Chiefs.

Questionnaire processing procedures were developed in the Decennial Processing Staff, **James S. Werking**, then Chief, under the direction of **Harry O'Haver**, then Assistant Chief. The clerical coding and microfilming of the sample questionnaires were performed at three decennial processing locations as follows: Data Preparation Division, **Don L. Adams**, Chief; Jeffersonville Processing Office, **Robert L. Kirkland**, then Processing Manager; New Orleans Processing Office, **Robert L. Allen**, Chief; and Laguna Niguel Processing Office, **Robert N. Scheller**, Chief.

User services were provided by the Data User Services Division under the supervision of **Michael G. Garland**, Chief, **Marshall L. Turner, Jr.**, and **Paul T. Zeisset**, Assistant Chiefs.

Data collection activities were supervised in the Field Division by **Lawrence T. Love**, Chief, under the direction of **Richard Blass**, **Charles Hancock**, and **George T. Reiner**, Assistant Chiefs, with the assistance of the directors and assistant directors of the Bureau's regional offices.

Geographic programs and plans were developed in the Geography Division under the direction of **Robert W. Marx**, Chief; **Joseph J. Knott** and **Silla G. Tomasi**, Assistant Chiefs; and **Donald I. Hirschfeld**, Special Assistant.

Publications editing, design, composition, and printing procurement were performed by the staff of the Publications Services Division, **Raymond J. Koski**, Chief; **Milton S. Andersen**, **Arlene C. Duckett**, and **Gerald A. Mann**, Branch Chiefs.

The Statistical Methods Division was largely responsible for weighting sample data and producing variance estimates. This work was supervised by **Charles D. Jones**, Chief; **Susan M. Miskura** and **Robert T. O'Reagan**, Assistant Chiefs. Important contributions were made by **David H. Diskin**, **Milton C. Fan**, **Thomas W. Harahush**, **Robert S. Jewett**, **J. Kim**, **Teresa A. Passalacqua**, **Charles E. Talbert**, **John H. Thompson**, and **Henry F. Woltman**.

The system design, technical specifications, assembly, and installation of the FOSDIC and Automated Camera Technology System were the responsibility of the Technical Services Division, **C. Thomas DiNenna**, Acting Chief, and **Robert J. Varson**, Branch Chief.

Many other persons participated in the various activities of the 1980 census. For a list of key personnel, refer to the *History of the 1980 Census of Population and Housing*, (PHC80-R2).

GENERAL

This report is part of the *Subject Reports* series and presents cross-tabulations of sample data on housing and household characteristics from the 1980 Census of Population and Housing. Data for selected subjects are shown for the United States, inside SMSA's, central cities, and outside SMSA's. Limited data on space utilization are also shown for regions, divisions, and States.

Legal provision for this census, which was conducted as of April 1, 1980, was made in the Act of Congress of August 31, 1954 (amended August 1957, December 1975, and October 1976), which codified Title 13, United States Code.

The abbreviated identification for this report is HC80-3-5 (i.e., Housing Census, 1980-Volume 3-Chapter 5). This report is one in a series of subject reports comprising Volume 3. (See inside front cover.) Each report in this volume concentrates on a particular subject. Generally, detailed information and cross-tabulations will be provided on a national level; in some reports, data for States or SMSA's may also be shown. For a description of the full data dissemination program of the 1980 Census of Population and Housing, see Appendix E, "Publication and Computer Tape Program."

The content and procedures of the 1980 census were determined after evaluation of the results of the 1970 census, consultation with a wide variety

of users of census data, and extensive field testing. A number of changes were introduced in 1980 to improve the usefulness of the census results. The changes do not, however, affect to any appreciable extent the comparability between the 1980 census data and the 1970 census data for most characteristics. Further information on comparability appears in Appendix A, "Area Classifications and Definitions and Explanations of Subject Characteristics."

More detailed information on the technical and procedural matters covered in the text of this report can be obtained by writing to the Director, Bureau of the Census, Washington, D.C. 20233. Such information will also appear in other publications of the 1980 census.

CONTENTS OF THE REPORT

This report contains text (this introduction and 5 appendixes), a table of contents, two maps, and 196 detailed tables. Each table is identified by a table number and title. The "stubhead" at the left under the title defines the types of geographic areas for which data are shown in the particular table and is considered part of the table title.

Appearing last in the report are the appendixes. Appendix A describes the various area classifications (e.g., regions, divisions, and States) and provides definitions and explanations for the subjects covered in this report. Appendix B briefly explains the residence rules used in counting the population and describes the data collection and processing procedures. Appendix C presents information on the sources of error in the data and on editing procedures. Appendix D contains facsimiles of the respondent instructions and 1980 census questionnaire pages showing the population and housing ques-

tions. Appendix E summarizes the data dissemination program of the 1980 census.

DERIVED FIGURES (Means, Medians, and Percents)

This report presents means, medians, and percents as well as certain ratios. The median—a type of average—is the middle value in a distribution; i.e., the median divides the distribution into two equal parts: one-half of the cases fall below the median and one-half of the cases exceed the median. Percents and other derived measures which round to less than 0.1 are not shown but are indicated as zero (i.e., "—").

Medians for rooms and age are rounded to the nearest tenth, for persons to the nearest hundredth, and for income, selected monthly owner costs, contract rent, and gross rent to the nearest dollar. In computing medians for rooms and persons in unit, the whole number is used as the midpoint of the interval so that, for example, the category "3 rooms" is treated as an interval ranging from 2.5 up to 3.5 rooms. In computing median rent, units reported as "no cash rent" are excluded.

The median is computed on the basis of the distribution as tabulated, which is sometimes more detailed than the distribution shown in this report. When the median falls in the lower terminal category of an open-ended distribution, the method of presentation is to show the initial value of the next category followed by a minus sign; thus, for example, if the median falls in the category "Less than \$100," it is shown as "\$100—." When the median falls in the upper terminal category of an open-ended distribution, the initial value of the terminal category is given followed by a plus sign; thus, for example, if the median falls in the category "\$500 or more," it is shown as "\$500+."

SUPPRESSION OF DATA FOR CONFIDENTIALITY

To maintain the confidentiality promised respondents and required by law, the Census Bureau takes precautions that its published data do not disclose information about specific individuals and housing units. To accomplish this, the Bureau suppresses data for characteristics which are based on a small number of persons and/or housing units in the geographic area. Under certain conditions, both primary and complementary suppression, as defined below, may take place.

The general rules of primary suppression of sample data are as follows: estimates of total population by race and Spanish origin are never suppressed; other characteristics for persons are shown only if there are 30 or more persons in the geographic area; estimates of total housing units, vacant housing units, year-round housing units, and occupied housing units are never suppressed; characteristics of year-round housing units which are not classified by occupancy

status are shown only when there are 10 or more year-round housing units in the geographic area; characteristics of families, households, or occupied housing units are shown only if there are at least 10 occupied housing units within the geographic area; and distributions of data for owners or renters are shown only where the number of owners is at least 10 and the number of renters is also at least 10. These primary suppression criteria are applied independently of one another. The comparable figures for complete count (100-percent) data are 15 or more persons and 5 or more housing units of the specified type.

Population and occupied housing unit characteristics cross-classified by race or Spanish origin (of the householder in the case of occupied housing units) are subject to an additional level of examination. This requires that the 30-person or 10-housing-unit criterion stated above be applied individually to each race or Spanish origin category.

Finally, complementary suppression is applied to prevent the derivation of

primary suppressed data by subtraction. For example, housing unit data shown by tenure may require complementary suppression when the number of owner-occupied or renter-occupied housing units is less than 10.

SYMBOLS AND GEOGRAPHIC ABBREVIATIONS

The following symbols and geographic abbreviations are used in the tables:

- A dash “—” represents zero or a percent which rounds to less than 0.1.
- Three dots “...” mean not applicable, or that the data are being withheld to avoid disclosure of information for individuals or housing units. (For further information on disclosure, see the section above on “Suppression of Data for Confidentiality.”)
- SCSA is standard consolidated statistical area.
- SMSA is standard metropolitan statistical area.

Regions and Census Divisions of the United States: 1980

Standard Consolidated Statistical Areas and Standard Metropolitan Statistical Areas

The data for "Inside SMSA's, Central cities" in Summary Tables 1, 2, and 3 are limited to urban portions of central cities; the data for "Central Cities of SMSA's" in the E and F groups of tables include urban and rural portions of central cities. The differences are slight as is evident when comparing the total occupied housing units for the two sections, but the preferred Census Bureau concept is that central cities be limited to the urban portions only. The total in the Summary Tables are, therefore, the preferred numbers.

Shown below are corrections to the "Rural Farm" counts for occupied housing units and occupied housing units with 1.01 or more persons per room. The rural farm units in the rural parts of places that are partially urban and partially rural were omitted in error from these tables. The data affected are in Summary Tables 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, and 16. Any such incorrect counts have been lined through (~~31-062~~) to indicate the error.

Summary Tables 1, 4, 7, 10, and 16 have one incorrect row of data for the data line "Rural Farm." The medians (rooms, household income, persons in unit, years of school completed by householder, value, selected monthly owner costs, selected monthly owner costs as percentage of household income in 1979, gross rent, contract rent, and gross rent as percentage of household income in 1979) shown in these tables may or may not be exact, but any variation would be minimal. Because of the nature of the tabulations, the precise medians are not available from other existing tabulations. The percents of occupied housing units with 1.01 or more persons per room for tables 1, 4, 7, 10, and 16 are correct.

Table 1. **Selected Occupancy, Utilization, and Financial Characteristics of Occupied Housing Units With 1.01 or More Persons Per Room: 1980**

Summary Tables 2, 5, and 8 have one incorrect row of data for the data line "Rural Farm." The percentages (renter-occupied housing units, lacking complete plumbing, built 1939 or earlier, units in structure, lacking central heating system, lacking air conditioning, no complete kitchen facilities, no vehicle available, year householder moved into unit, and nonrelatives present) shown in these tables may or may not be exact, but any variation would be minimal. Because of the nature of the tabulations, the precise percentages are not available from other existing tabulations.

Summary Tables 3, 6, and 9 have one incorrect row of data for the data line "Rural Farm." The percentages (with related children under 18 years, income in 1979 below poverty level, married-couple families, female householder, no husband present, householder characteristics, and no workers in household in 1979) shown in these tables may or may not be exact, but any variation would be minimal. Because of the nature of the tabulations, the precise percentages are not available from other existing tabulations.

Table 3. Household Characteristics for Occupied Housing Units With 1.01 or More Persons Per Room: 1980
